

# Keyboard A11Y

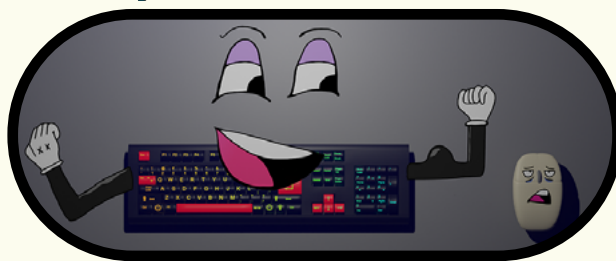

## 2.1.1

**Keyboard:** All functionality of the content is available through a keyboard interface without requiring specific timings for individual keystrokes except where the underlying function requires input that depends on the user's movement and not just the endpoints.

Keyboard Key	Function and Purpose
TAB	Moves focus between interactive elements.
SHIFT	Used with TAB key to move focus backwards through interactive elements.
ARROW KEYS	Navigate through menus and form fields.
SPACEBAR	Select options within groups and controls.
ENTER	Activate forms and interactive prompts.
ESCAPE	Close windows, exit form fields, cancel the current context or operation.

Everything a mouse can do...
